

*Accessible, reliable and affordable
solar-powered irrigation for Europe
and beyond*

Trade Mission: Morocco

Marrakech, September 26th and 27th

The SOLAQUA project invites you to participate in the next trade mission that will take place in the city of Marrakech on September 26th and 27th with the theme of photovoltaic irrigation. The objective of the mission is to facilitate the meeting of Spanish and European companies with the main Moroccan players in the irrigation and photovoltaic sectors (companies, end customers, business associations and financial institutions).

This meeting represents an opportunity to get in touch with a new photovoltaic irrigation market, which is in full expansion, in order to contribute to the internationalization, export and improvement of the competitiveness of companies.

The first 10 companies to register, before September the 8th, will benefit from the SOLAQUA project by covering 100% of the travel and accommodation costs for one person.
